

Miryam Paysik

QA Engineer

Phone: 050-2410208, Mail: mirielinor01@gmail.com

3 years of experience in manual QA, searching for my next challenge, Strong ability for self-learning, excellent problem-solving skills, bug detection, and technical expertise, with strong communication skills, teamwork abilities, and high motivation.

Work Experience:

2022-2025 Commbox, QA manual & Automation.

Commbox developed a multi-channel platform for customer service and sales.

As part of the R&D team, we work in Agile **methodology** and lead testing processes from the specification stage, including writing test documents, **STD, STP** testing all types of manual testing on a **web** and **mobile-web** application, knowledge with **API** testing using Postman, and wrote **SQL** queries in an **MYSQL** database. reading logs in the **Kibana**, Working daily with **JIRA**, executed tests in **XRAY**, and wrote automation scripts and test cases using **Python** and **Selenium**. documented processes in **Confluence**, and handled version integrating with **CI/CD** systems using **Jenkins** and **GitHub**.

Working closely with the support teams and company clients, demonstrating strong teamwork across all departments in the R&D. self-motivated, highly organized, and capable of working under pressure.

2021 L.S Technology, QA manual.

L.S project solutions company in web and mobile, internship at the company.

We work in an **Agile methodology**, one QA tester in the develop team.

using **exploratory testing**, write **STD** tests.

Knowledge with **GenY motion**, **Browser Stack**.

Education:

2020, SV College - specializing in technology training, in software testing (QA).

practical knowledge in manual and automated testing, testing methodologies, common testing tools, and document writing such as STD, STP, and STR.

The course provided me with a strong foundation for further professional development in the field.

2025, Automation College - professional courses in automation.

Develop and execute automated tests, including working with tools like **Selenium**, **Appium**, and **Postman**, **Python** and **Java**, automating API tests, integrating with CI/CD systems, and writing automated test scripts.
